SUBJECT: 30th Medical Brigade Reserve Component (RC) and National Guard (NG) 90-Day Provider Rotation Policy/Guidance

1. All RC and NG medical professional staff, to include all physicians, dentists, and certified registered nurse anesthetists (CRNA), not in command positions, fall under DA policy paragraph 9, 221025ZJAN03, "Modification To The Army Rotation Policy." This policy mandates a 90-day term of employment, once a provider enters the theater of operation.
2. The 30th MB routinely identifies those RC & NG personnel that need a replacement at the 90-day term of employment, and ensures that both FORSCOM and the United States Army Reserve Command (USARC) has identified the incumbent for mobilization into the OIF theater of operation.
3. Although DA policy mandates a 90-day term of employment for these providers, at times there may be circumstances where USARC cannot mobilize a provider in time to allow the current provider to depart the theater of operations exactly at the 90-day term of employment. The 30th Medical Brigade (MB) command policy is to rotate these providers at the 90-day term of employment if a replacement has arrived in theater.
4. No RC or NG medical professional staff member is permitted to depart the OIF theater of operations until the replacement has been fully integrated into the gaining unit. The amount of overlap time will be determined by the subordinate command, but will not exceed 14 days. Any requested deviation from this policy must be formally staffed through the chain of command to Commander, 30th MB.
5. The 30th MB will ensure that there is no degradation of healthcare to CJTF-7 forces between the incoming and outgoing healthcare providers.
6. POC for this policy guidance is MAJ James Andrews, 30th MB, 302-558-4936/4910.

DONALD A. GAGLIANO
